

Electronic prescribing is rolling out

Step

1

Confirm that you are eligible. Only medication you receive from your local community pharmacy is eligible for ePrescribing QR codes.

WA Health hospital pharmacies still require a paper prescription.

Step

2

If you are eligible, during your consultation your prescriber can send you a link to a QR code via SMS or email. Alternatively, paper prescriptions are still available.

Step

3

Present the QR code at your local community pharmacy for them to scan or discuss creating an Active Script List with your pharmacist.

Step

4

Once dispensed, your local community pharmacy will send a new SMS or email with a link to any repeat prescriptions.
